## ABERHART WILL BE PREMIER OF ALBERTA

### Polls in Coleman Well Manned for Election

Faithful Workers of All Parties Stuck Faithfully to Tasks as Scrutineers

Thursday morning election workers were out well in advance of the opening hour of the polls. Most prominent were the Social Credit workers with colored ribbons on coat lapels, while Albert Knowles had plastered the vacant bill-boards with Duke's name in letters a foot high.

The vote came in fairly steady from the opening hour, and it is interesting to note that whereas in the 1930 election 3267 votes were cast in Rocky Mountain constituency, on Thursday 5477 votes were polled, with one small poll to be recorded, an increase of 2210, without spoiled ballots being included.

George Cruckshank polled 266 votes in 1930 in Coleman; last Thursday he received 34, and showed corresponding decreases in all polls with the exception of Banff where he polled 180 as against 339 in 1930. McNeil polled 336 votes in Banff, just three less than Cruckshank polled there in 1930. Cruckshank's total was 378 as against 164 in 1930.

Labor-Communist votes showed a big slump in Coleman. In 1930 the total votes polled by Stobbs and Sudworth was 491; last Thursday, Murphy polled only 119, a drop of 372 labor votes.

Party lines were swept aside in the voting. No matter who were Social Credit candidates, they were swept into office. Rev. Roy Taylor gained his seat in Pincher with a big majority over H. Bosseberry, former member.

McNeil polled a total of 1034 votes on his first campaign, a very good showing compared with other Liberal candidates, while Murphy, Communist, polled 1081, Blairmore, Hillcrest, Frank and Camrose, giving him a heavy vote, but still considerably behind Social Credit.

Liberal workers had antic-

Next race Red Deer, 186 miles, Sept. 1.

### Local News

Mrs. J. Jenkins and daughter left for Vancouver over the weekend.

Tom Lloyd of the Rialto pool room is spending a vacation at Arrow Lakes.

Mr. and Mrs. A. Harry, Joe and Alex Kapalka motored to Manitou last week.

Mrs. V. Pearson, nee Chrissie Fraser, is visiting her parents, Mr. and Mrs. Archie Fraser.

Norma Plante is spending three weeks vacation from Royal Jubilee hospital, Victoria, B.C.

Emma Antel returned last week to her school at Grouard Alta.

Mrs. A. E. L. Davidson and two children arrived yesterday from Hanna, and have taken up residence in G. R. Powell's house.

Mr. and Mrs. John Burrell accompanied by Matt Burrell and Miss Mary Gray were the guests of the former's daughter, Mrs. D. Young of Lethbridge last week.

Mr. and Mrs. B. M. Hall and daughter left this morning for Calgary, after three years residence in Coleman, Mr. Hall having been transferred to the city by the Alberta Liquor Control Board.

Surprise Party  
A number of young people gathered on Thursday last at the home of Mrs. R. Tiffin, Sixth street, where a surprise party was held in honor of Miss Irene James on her twenty-first birthday.

The evening was spent in playing games and dancing. At 11:30 the guests enjoyed a tasty supper served by Mrs. James and Mrs. Tiffin. An attractive birthday cake decorated with twenty-one candles, centered on the table.

Always imitate the behavior of winners when you lose. Respect yourself the rest will follow.

Quick Work by Lethbridge Herald

Before 8 a.m. on Friday morning the special election issue of Lethbridge Herald was distributed through the Pass towns and was soon on sale by the local newsboys. Complete returns were given of southern constituents, including Rocky Mountain, and it was a service to readers which elicited much favorable comment.

Elected in Pincher Creek

Rev. Roy C. Taylor, elected in Pincher Creek constituency, served in the ministry at Hobema Indian reserve, Crossfield, Hillcrest, Lethbridge, New Dayton and Coleman. Born at Sunnyside, Alta., Dec. 11, 1889, he was educated at Wesley College, Winnipeg, St. Stephen's College, Edmonton, and the University of Alberta. He served with the 41st Battalion and the 15th Battalion, C. E. F., serving in France, returning in 1919. The Pincher Creek Echo states in 1916 he was with the 13th C. M. R., and in this connection it is interesting to note that in their "Twenty Years Ago" column his name appeared as one of the winners at a military sports day there.

His father was a pioneer settler in Alberta in 1881, and is still living at Wainright, Alta.

ST. ALBAN'S CHURCH, COLEMAN

Eleventh after Trinity. The services will be 1:30 Sunday School. 7 p.m. Evensong.

Mr. and Mrs. B. M. Hall and daughter left this morning for Calgary, after three years residence in Coleman, Mr. Hall having been transferred to the city by the Alberta Liquor Control Board.

# The Most Delicious Tea "SALADA" TEA

Make Your Own Job

Conditions throughout the world during the past five years have admittedly been most discouraging to all people, but especially so to youth. As boys and girls have come out of school and college ready to take their place in the business world, even at the bottom of the ladder, they have discovered there was no place for them. They have been denied even the opportunity of making a start because the financial and economic world has been out of joint, with business marking time, and no development work being undertaken.

As a result, thousands have become discouraged, embittered because of den's and frustrated hopes and ambitions, have become drifters because they have lost hope for the future and accepted the easy but mistaken view that present conditions must be accepted as permanent conditions. Lacking any background of years in which work was plentiful, and having no experience in profitable employment, they can see no light ahead.

Such an attitude of mind is a terrible mistake. Future years will be just as bright, in fact brighter; just as busy, in fact busier; just as rich in opportunity and in enterprise development, in fact more so. The world will not stand still; neither it will move backward. Since the beginning of time and the dawn of civilization the movement, despite temporary setbacks, has always been both onward and upward. It will continue so.

Consider the most familiar names of people and products on the lips practically of everyone today—Henry Ford, Firestone, H. J. Heinz, Coca-Cola, Borden's Milk, Hirson's Root Beer, Welch's Grape Juice, Maxwell House Coffee, Jell-O, and similar names. Do these names mean anything to the youth of to-day? They should.

It was in 1890 that Henry Ford began working on a double-cylinder engine in a little shop on his farm. When he went to work in Detroit at \$45 a month he took his shop along, and in 1893 his gasoline buggy was running and for a long time was the only automobile in Detroit. Forty years later he was rated a billionaire.

Firestone was a buggy salesman who became convinced there was a great future in the rubber business. He bought strips of rubber, cut out crude solid tires and fitted them to buggy wheels. Thus began the great tire industry of to-day.

H. J. Heinz used to grow horse-radish in his garden and peddle it from door to door. This backyard venture put him on the road to becoming Heinz 57.

In 1886 a doctor in Atlanta stood working over a kettle in an old house. On the next corner was a drugstore, and periodically the doctor rushed over, squirited carbonated water into a glass containing a sample of syrup, and tasted the mixture. After about 300 attempts he had the first Coca-Cola.

While holidaying in New Jersey, Charles E. Hirson was served a drink by a farmer's wife. Its ingredients were saffras, teaberry, and sweet fern, all gathered locally. Hirson smacked his lips. Returning home he experimented with herbs, roots and barks. Thus was Hirson's Root Beer born.

John Wanamaker, the great merchant prince of the United States, delivered his first bill of goods from a wheelbarrow. Adam Gimbel, founder of the stores which bear his name, started with a pack on his back. Timothy Eaton started in a little corner lot store. The story of Woolworth's five-and-ten cent stores is well known to call for repetition. The Great Crane Company, manufacturers of piping, valves, bath-room fixtures, etc., had its inception in a little brass foundry.

These great enterprises of to-day had very humble beginnings, many of them within the life of the present generation. Opportunities are just as great to-day. "What's going to alter our lives is probably happening this minute in a backyard workshop, where some crank is thinking by himself," Henry Ford declared recently. Another man states it this way: "Many of the million-dollar corporations of to-morrow are starting to-day with little capital but an idea. They are beginning in attics, cellars, kitchens, and in the minds of clerks behind store counters."

Recently the head of a huge business in the United States selling many different products sold about four new products, all launched since January, 1930, and now selling widely. David was not afraid of Goliath, and observant youth with an idea or capable of assimilating one, with vision, enterprise and daring can just as successfully win out against the Goliaths of big corporations.

To quote Henry Ford again, who recently said that unemployed people "should create their own businesses, no matter how small, instead of waiting for some one to give them a job." And as a writer in *Forbes Magazine*, from which much of the above is taken, says: "Ten years from now we will be reading more success stories gathered from the kitchens and cellars of 1935." No one who has a work-bench or a stove and a dollar—and an idea—he says, need be discouraged.

## Strange Service

700 Deaf Mutes Worship In St. Paul's Cathedral

One of the strangest and most touching services ever held under the mighty dome of St. Paul's cathedral on a recent Sunday saw 700 deaf and dumb persons from 14 nations pray and sing without a sound being heard. They were attendees attending the fourth international games for the deaf and mute held in London. The service was conducted in the international sign language. Chaplains and missionaries mounted the lofty pulpit and voicelessly acted out the prayers, hymns and songs with eloquent looks and gestures.

Then the congregation joined in prayers and hymns.

## A Large Birthday Gift

British Secretary Of Air Receives Two-Plane Hangar

Lord Londonderry, British Secretary of Air, has just celebrated his 67th birthday, and his wife's present to him was a hangar big enough to accommodate two airplanes. It stands on his estate at Mount Stewart, Newtonards, Northern Ireland, where there is already an airport with a landing field of 50 acres.

British laundries have an annual revenue of approximately \$10,000,000 from handkerchiefs alone.

## Would Solve Problem

Shipment Of Eggs From England Made As Experiment

A few dozen English eggs are making history. Thirty of them arrived in Sydney, Australia, after an air journey from London to Brisbane, and a railway journey of 500 miles from Brisbane to Sydney. The rest reached Rio Grande do Sul, Brazil, after travelling more than 6,000 miles from London by airplane and Graf Zeppelin. Now Lord Greenly, the promoter of the experiment, is anxiously awaiting special letters from Australia and Brazil reporting on their condition on arrival. The eggs are successfully hatched out, one of the greatest problems of poultry farmers throughout the world will be solved. Under present conditions it is impossible for poultry farmers in distant parts to renew their stocks by introducing young chicks from England.

The deep-sea fish, Chimaodon Niger, famous for its voracity, sometimes manages to swallow a fish larger than itself.

More common colds are contracted during October than in any other month, according to records of the public health service.

Before you invest in a going concern, make sure you know which way it is going.

## For So-Called Luxuries

Bureau Of Statistics Has Issued Some Interesting Figures

What are luxuries? The Dominion Bureau of Statistics started to compile figures on the luxuries produced and consumed in Canada in a year, and was confronted with the difficulty that one man's luxury is another man's ordinary, everyday comfort. This is true of food, furniture, clothes and so on. Even tobacco is claimed by some to be a necessity. So the bureau finally decided to list everything as a luxury which is actually above the line of necessities. It included, therefore, such things as carpets, silverware, jams and cooked meats, and so, naturally, it did not present its conclusions as a hard-and-fast statement of luxury consumption in Canada, but rather "attempt to throw some light on the production and consumption in Canada of goods which are more or less in the nature of luxuries." It found that the factory value of these in 1933 was \$263,605,185, or 12.6 per cent. of the total value of production in Canadian manufacturing industries. The retail values would, of course, be much higher.

The bureau also obtained Canadian consumption figures by subtracting exports from the figures for imports and production. It found that in 1933 the so-called luxuries were consumed to a factory value of \$268,429,10.

Some of the individual items are rather interesting. Canada eats candy to the extent of nearly \$17,300,000 per year; ice cream to the extent of more than \$7,300,000; other confectionery, including chewing gum, over \$6,000,000. Pies, cakes and pastry account for more than \$10,500,000; beverages (not including tea, coffee, cocoa, etc.), nearly \$21,000,000; silk hoseery (which the bulletin says is not often considered a luxury nowadays), nearly \$5,400,000; toilet preparations, over \$5,000,000. These are all factory values.

The surprising item in the list is that for tobacco, as follows:

1931	1933
\$6,016,138	\$7,475,383
Cigarettes . . . . .	36,132,977
Other . . . . .	32,842,202
	\$15,986,679

\$74,991,347      \$71,274,213  
These again are factory values. For passenger automobiles, bicycles and boats, the people of the Dominion paid the manufacturers less than half what they did for tobacco in both these years: \$28,254,884 in 1932, and \$24,518,970 in 1933.—Toronto Daily Star.

## Favors Stiff Sentences

Severity For Prisoners Demanded By German Minister Of Justice "Severity" for prisoners as a Nazi tenet was demanded by Franz Guertner, minister of justice, at the opening of the 11th quinquennial penal penitentiary congress in Berlin.

"If criminal law is to represent atonement for wrong done the community," he told the 400 delegates from 50 nations, "and hence defend and protect the national community from evil-doers, the logical result is severity in the treatment of prisoners so the punishment may be appropriate to the evil."

Guertner also announced that the Nazi Reich has definitely rejected the ancient legal principle: "Nulla poena sine lege" (no punishment unless a law is infringed). Instead, he said, it has substituted the maxim: "Nulla crimen sine poena," under which, punishment is meted out regardless of the incompleteness of a law.

## American Boy Divers

Crude Combination Of Many Articles Enables Boys To Submerge

Three Maine youths wanted to see what the bottom of Kennebec River in Richmond, Me., looked like.

So the boys, Paul R. Dyer, Stanley Griffin and Robert Cate, constructed diving apparatus from a five-gallon gasoline can, two automobile tire pumps, a small corrugated can and some cement.

Successful in their first attempts, they plan to explore greater depths.

## Anxious To Know

A very nice old lady had a few words to say to her granddaughter.

"My dear," said the old lady, "I wish you would do something for me. I wish you would promise me never to use two words. One is swell and the other is lousy. Would you promise me that?"

"Why sure, Granny," said the girl, "the words are the words."

Loprey reached the United States from both Europe and Africa.

The oldest fruit known to mankind is the olive.

## Celebrating Anniversary

Violin Industry Started In Germany 250 Years Ago

Mittenwald, Germany, a village in the mountains of Bavaria is now celebrating the 250th anniversary of its violin industry, begun in the 17th century by Mathias Klotz.

Throughout the summer the town folk presented a play, "The Song of the Stars," telling the story of Klotz and his wanderings over Italy, where he learned instrument making. The play will be staged again this winter at a nearby town as part of the entertainment for the winter Olympics.

The story of Mathias Klotz is a romantic one. When he was a boy of 10 his peasant family sent him to Italy to study under famous violin makers there. Twenty years later he returned to Mittenwald, where he built his own workshop. Apprentices flocked to him and soon he established the fame of the town for fine instruments, a reputation Mittenwald retains to-day.

After making a number of instruments, Klotz's craftsmen had to go out into the world themselves to sell them.

Strapping their violin on their backs they wandered through nearby countries, giving demonstrations and making sales in castles and great monasteries.

## Correspondence Courses

Extending Education To Those Out Of Reach Of Schools

Nine years ago the Ontario department of education started correspondence courses for persons out of reach of school—either for the whole school year or part of the summer months. The courses were intended also for those physically unable to attend school and for whom no provision was made for education.

During the last school year the enrolment was 1,800 of whom 50 were physically unable to attend school. The courses are free and the department pays all expenses. Average cost of educating a pupil for a year in this manner is from \$12 to \$15.

## FASHION FANCIES

These again are factory values.

For passenger automobiles, bicycles and boats, the people of the Dominion paid the manufacturers less than half what they did for tobacco in both these years: \$28,254,884 in 1932, and \$24,518,970 in 1933.—Toronto Daily Star.

## Gift Was Acceptable

## Marking The Ballot

Strange As It May Seem, Many Voters Muff The Job

Placing an X beside a candidate's name is a simple task but at the approaching Dominion general election it is likely 25,000 or more electors will muff the job.

In the 1930 contest 24,119 lost their votes through improperly marked ballots and there are more parties and candidates this time to confuse the voter.

Parliament places the ballots in the hands of voters and supplies pencils to mark them. That is as much as it can do. Electors have only to make the crosses themselves. Yet in 1930 ballots were rejected in every constituency in Canada.

Markings in addition to the cross, of a pen or colored pencil instead of the black pencil provided and signing of the ballot by the voter are the most frequent causes of spoiled ballots.

Through habit many men use their fountain pens and deputy returning officers throw out their ballots. On recounts, however, judges frequently have ruled such ballots valid. The Election Act says the cross must be made with a black pencil.

Many persons start to mark their X opposite the wrong name, score it out and then mark it opposite the candidate they wish to support. This spoils the ballot. They should ask the deputy returning officer for a new one.

Voters sometimes ask why all this fuss about markings when the voter's choice is plainly indicated? The answer is that precautions are necessary to discourage bribery. They are the culmination of years of experience with elections, the frailties of human nature and the cunning of some politicians.

In the '30's and earlier when the population was small, party workers knew which voters were Conservative, which Liberal and those "on the fence." Of the undecided variety some would sell their votes and the temptation of workers in a close race was strong.

But unless the vote buyer could be sure that he bought to his candidate there was no use buying them. Many ingenious devices were used to allow party scrutineers to identify ballots while they were being counted. The result has been the regulations to prevent distinguishing marks.

Election workers claim there is very little direct bribery now. Ridings are so populous and party affiliations of voters so indefinite it would cost too much. In addition there is the almost certain risk of the election being voided.

## Gift Was Acceptable

King Pleased With Jubilee Offering From Free State

The Jubilee present which Loyallists in the Irish Free State have given King George is declared to be not only nationally appropriate but most acceptable to His Majesty. It is a beautiful antique silver potato ring. These rings, which measure up to a foot in diameter, were in former times put in the centre of the dining table and within them were placed the potatoes, cooked in their jackets, to keep them from rolling about. Reminiscent of the days when the potato was the staple diet even of the wealthy, a sixteenth century ring of good design has sold a auction for considerably over \$5,000. The King is as devoted to old silver as the Queen is to antique furniture.

The dress is blue and white dimity. The apron is white dimity which is also the dress of the maid.

And isn't the one-piece apron attractive? It has suspender straps and it won't slip off the shoulders.

Style No. 910 includes the dress and apron, size 16. Style No. 911 includes the dress and apron, size 16. Size 16 requires 3 1/2 yards of 38-inch material for dress with 1 1/2 yards of 35-inch material for apron and dress.

Pattern 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Summer Wear Book contains many more smart, cool vacation clothes. Send for your copy to-day. The price is 15 cents.

Rainbows are not semi-circles, but complete circles. If we were high enough in the air, we could see the entire circle.

It has been estimated that approximately 12 pounds of air is required to burn one pound of coal.

Mammoth cave, Ky., has been equipped with 12 floodlights and 10 smaller projectors to illuminate its interior.

You can tell  
by his smile

Things are looking up...  
times have improved and he's again "rolling his own" with Ogden's Fine Cut. Why not "get back to Ogden's" yourself and again give yourself the pleasure Ogden's alone can give. Use the best papers, too... "Vogue" or "Chantecler".

52 Poker Hands, any number, now accepted as a complete set.

Your Pipe Knows Ogden's Cut Plug

Wiley Post

Some Of The Aerial Exploits Of This Famous Flyer

Here are the aerial exploits of Wiley Post, who with Will Rogers, film comedian, was killed in an airplane crash in Alaska.

With Harold Gatty, Post flew around the world in eight days, 15 hours, and 15 minutes, in 1931.

In 1933, he made a solo round-the-world flight, seven days, 18 hours, and 49 1/2 minutes.

The following year, Post announced he would concentrate on the practical side of aviation. He made two sensational high altitude trips over his home town of Bartlesville, Okla., wearing a "super-charged" suit of his own design.

Post made four unsuccessful attempts to make a transcontinental flight through the stratosphere. Each time he was forced down on the way from Burbank, Cal., to New York, the last failure June 1, this year.

He used but one ship in all of his achievements—the "Winnie Mae."

## Odd Trick Of Nature

Sailor Relates Story Of Three-Year Bath In 33 Fathoms

Nelson Lash was in the crew of the scalloper, Virginia, three years ago when she was rammed and sunk off Georges Banks. With his clothes in a forecastle locker, he initial embroidered in a corner.

Now Lash has his handkerchief again, for he's in the crew of the Louis A. Thebeaud, and in her scallop drags the crew found a handkerchief—with Lash's initials in the corner, in almost perfect condition after a three-year bath in 33 fathoms!

Only One Limit

Ten years ago the late Will Rogers was in a plane which had left Los Angeles for Kansas City. The ship hit an air-pocket and dropped 200 feet. "How far, how far," asked a frightened passenger, "can one of these planes drop?"

"Well," Rogers informed, "the ground's in limit, boys!"

Mammoth cave, Ky., has been equipped with 12 floodlights and 10 smaller projectors to illuminate its interior.

# United States Warns Soviets To Cease Political Propaganda

Macmillan.—The United States Sunday delivered an "emphatic protest" against activities of the seventh congress of the Communist International, which has just closed.

In a blunt speech Vice-Commissioner Krestinsky, United States Ambassador William C. Bullitt, said these activities involved interference in the internal affairs of the United States. He called them "flagrant violation" of the pledge made by Soviet Russia at the time she was recognized by the United States. Krestinsky is in acting charge of foreign affairs.

The American government, the ambassador said, "anticipates the most serious consequences" if the U.S.S.R. "is unwilling or unable to take appropriate measures to prevent further acts" in disregard of its pledge to prohibit activities in its territory aimed at changing the political or social order of the United States.

Some speakers at the congress had indicated the eventual aim of the Communist party in the United States was establishment of a Soviet government. The congress generally approved sentiment for a union with socialist groups in a "united" fight against Fascism the world over.

Washington.—Blunt warning that United States recognition of Russia might be withdrawn unless the Soviet government acts promptly to end Communist agitation here was read by observers into a note delivered in Moscow by Ambassador Bullitt.

Even those who kept in close touch with the developing situation were surprised at the stern tone of the communication and what they considered an outright threat disguised but thinly in diplomatic verbiage.

First reactions from members of congress who were active in the long dispute that preceded recognition were both sharp and favorable.

## Pilot Makes Night Flight

Red Lake, Ont.—Pilot H. O. Maden was credited with having made the first night flight in northern Ontario aviation history. His plane, loaded with men and equipment, maden off to fight a forest fire late at night, guided only by the feeble light of the moon in his takeoff.

## Takes Over New Job

Ottawa.—C. E. Davidson, member of the Dominion Marketing Board and wheat expert of the bureau of statistics, left for Winnipeg to become secretary and statistician for the new wheat board. His new job meant his resignation from the government service.

# Great Britain Is Firm In Resolve To Prevent War

London.—Great Britain, an advised informant told the Associated Press, will go to any length under the lease covenant to try to prevent war in Africa.

Other powers join her, he said, she will subscribe not only to financial and economic pressure upon the aggressor but to the use of military, naval and air sanctions. (In other words, display of force.) She will even consider joint closure of the Suez canal.

The informant said the cabinet, in emergency session, decided to seek a peaceful settlement by every possible device but, if that fails, to advocate the use of the strongest league instrumentalities provided — and this was definite — she does not stand alone. Britain does not intend to police the world single-handedly, he said.

The cabinet emphasized, the informant said, its determination to support the covenant of the league and all treaties.

He added the League of Nations must decide the type of sanctions to be employed in event of hostilities and how forcefully they are likely to be employed.

The decisions were reached toward the close of a four and three-quarters hour meeting during which the ministers solemnly reviewed the whole problem.

The keynote of the cabinet's decision was embodied in the statement made July 31 by Sir Samuel Hoare, foreign secretary, in the house of commons when he said: "I do not concur."

## Cabinet Transacts Business

### Passes Orders To Be Approved By Governor-General

Ottawa.—Cabinet council sitting Aug 20 for the first time in a week, passed some orders-in-council respecting the Public Works Construction Act, it was learned, but no detail will be made known until they have been approved by the governor-general or his deputy.

It was assumed the contracts referred to the railway equipment orders for which, under the Supplementary Public Works Construction Act of last session, \$15,000,000 was voted. Under that act the government was empowered to advance money to finance rail equipment orders for both the Canadian National and Canadian Pacific Railways, repayable by arrangements as an employment relief measure.

No appointments were made. Prime Minister Bennett said at conclusion of the council session. It is expected a minister of marine will be appointed shortly, this being the only outstanding vacancy now remaining.

## Drought Plan

### Interest Shown In Water Development Scheme

Ottawa.—More than 4,800 farmers and ranchers throughout the drought area of the prairie provinces had applied for assistance under the water development scheme organized as part of the Prairie Farm Rehabilitation Act, Agriculture Minister Robert Weller stated.

"The problem of supplying a more adequate and dependable water supply for domestic use and livestock and for irrigation where feasible, for the growing of feed and garden stuff is a vital one on many farms and ranches," he said.

"Of the total applications received to date, nearly 350 are from Manitoba, over 2,800 from Saskatchewan, and somewhere around 1,400 from Alberta."

## Says Consent Needed

### Closing Of Suez Canal Must Have Approval Of France

London.—United States Senator Frank P. Pope of Idaho, stated here that Great Britain is powerless to close the Suez canal to Italy, in the event of war, without the approval of France.

"The British government cannot act because of the peculiar ownership set-up of the canal," he said. "I have learned that the British government owns only 44 per cent of canal shares, the remaining 56 per cent being publicly traded, with most of them held by the French."

The board of Suez directors is composed of one Dutchman, 10 Englishmen, and 20 French, with important executive offices held by Frenchmen."

## Would Recognize Pilot

### Akaskan Airman May Be Awarded Distinguished Flying Cross

Washington.—The Distinguished Flying Cross will be awarded to Joseph C. Conroy, Alaskan aviator, who flew with Will Rogers and Wiley Post from Point Barrow to their homeland, by the Alaska delegate in congress. Delegate A. J. Dimond pointed to other outstanding flights by Conroy including the discovery of the body of Carl Ben Eielson on the Siberian coast, his aid to Wiley Post when the latter was setting a globe-circling record, and other humanitarian flights in the northland.

## Free Of Rust

### Alberta Crops Escape Damage And Some Good Yields Expected

Calgary.—Alberta crops are free of rust this year and "bumper" yields are expected in some areas, Dr. G. B. Sanford, head of the Dominion laboratory of plant pathology, University of Alberta, reported here on his return from an inspection tour.

Dr. Sanford, who visited fields from Edmonton to Lethbridge, east to Medicine Hat and through the irrigated lands estimated crops on irrigated lands south of High River were average 25 bushels to the acre. In Calgary district and north, he said, the return will be much higher, while around Olds and Lacombe some real "bumpers" were expected.

## Position Of Dominions

### If Great Britain Goes To War New Zealand Would Be Involved

Wellington.—Premier George W. Forbes has reiterated that any war in which Great Britain became involved was automatically the concern of New Zealand.

While the prime minister was addressing a public meeting he was asked regarding his attitude if Britain went to war in Canada, that New Zealand would automatically participate. Mr. Forbes replied that was merely a repetition of a previous statement in parliament, that if Britain became involved in war this country also would be involved.

## May Develop Coal Mine

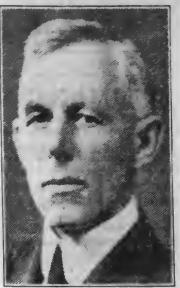

Turner Valley, Alta.—A British syndicate backed by almost unlimited capital is considering financing and developing the Burn coal mine west of Turner Valley, Hon. George Headley, Alberta minister of trade and commerce, said in an address here.

PRINCE'S SON SHOES A HORSE

Lord MacDuff, son of Prince Arthur of Connaught, came of age Aug. 9, the occasion being marked with a gay festival at Mar Lodge in the Highlands. Attached to the Royal Scots Greys, the young Prince is seen here shoeing a horse, part of the regular training course.

HON. JOHN T. HAIG

# Last Hour Effort Made By Britain To Maintain Peace

London.—Britain re-opened discussion with France in a last-hour effort to avert an Italian-Ethiopian war and at the same time prepare to take precautionary measures in its colonies should the final peace effort fail.

A surprise series of several ministers in the cabinet took up residence at Downing street, presided over by Acting Prime Minister Ramsay MacDonald. It became clear that the government has far from given up hope, and contemplated a definite series of peace steps before asking for the most extreme measures possible in the League of Nations—military, economic and financial sanctions.

The sanctions will be asked as a last resort, particularly if Italy does not participate in the Sept. 4 session of the league council.

Britain's communication to France was believed to contain an analysis of the position assumed by the cabinet at its extraordinary meeting Thursday. The response to this note will be of the utmost importance in formulating the policy which Great Britain and France and associated nations will take at Geneva should the conflict be averted formally before the bar of world opinion at the September meeting of the league.

For over 40 years," Mr. Caham said in a statement, "Thanksgiving Day was always fixed for a Thursday in October. The day as the king's proclamation always states is fixed as 'a day of general thanksgiving to Almighty God' for the blessings with which Canada has been favored during the year.

"In later years the churches of Canada have complained that a weekend holiday the religious character of Thanksgiving Day has been almost completely lost sight of, and that the day has become one for holiday excursions and frivolous entertainments, which are not consistent with the objects for which the day was originally set aside."

## Thanksgiving Day

### Changed From Monday To Thursday This Year

Ottawa.—Opposition to any further change in the date of Thanksgiving Day for this year was expressed by Hon. C. H. Caham, secretary of state.

Churches favored Thursday instead of Monday for the holiday.

The secretary of state has responsibility for deciding the date. Originally it was fixed for Monday, Oct. 14, but when that was selected as election day, Thanksgiving was moved to Oct. 24, a Thursday.

"For over 40 years," Mr. Caham said in a statement, "Thanksgiving Day was always fixed for a Thursday in October. The day as the king's proclamation always states is fixed as 'a day of general thanksgiving to Almighty God' for the blessings with which Canada has been favored during the year.

"In later years the churches of Canada have complained that a weekend holiday the religious character of Thanksgiving Day has been almost completely lost sight of, and that the day has become one for holiday excursions and frivolous entertainments, which are not consistent with the objects for which the day was originally set aside."

## Arrest Suspected Spies

### Two Nazis Taken Into Custody By French Police

Metz, France.—Police announced yesterday they had uncovered ultra-modern methods used by alleged German spies with the arrest of two Nazis.

Louis Altmeier, 25, and Jean Hubert, 30, who police called "go-betweens" for another alleged spy, were nabbed as they crossed the border daily to a couple of shovings.

Authorities said Altmeier had a pocket lamp capable of emitting red and green beams, enabling him to signal in code over long distances. Police claimed both men confessed to espionage. They are being held in jail.

## Prairie Crop Estimate

Winnipeg.—A prairie wheat crop of 295,000,000 bushels was estimated by the Searey Grain Company in its crop survey based on reports from 1,169 correspondents. The prairie crop last year was 263,000,000 bushels.

every avenue toward a peaceful solution.

France in turn is continuing its conversations with Italy and it was said the British government will not step into the situation unless the Franco-Italian exchanges prove fruitless.

Informed quarters said the Committee for Imperial Defence had approved plans for speeding up the redistribution and reinforcement of military forces at vital points along the empire's lines of communication.

The committee met at 10 Downing street with Acting Prime Minister Ramsay MacDonald presiding.

Plans for strengthening the defence of British territory adjacent to Ethiopia and for the reinforcement of all strategic points along the Mediterranean, the Suez canal, and African areas have been under way quietly for about two months, it was learned, and the decision to speed up the program was regarded as precautionary.

Ramsay MacDonald reviewed the overnight developments of dispute with his miniature cabinet in Downing street before leaving for Lorraine, Scotland. Mr. MacDonald is again acting as prime minister with Stanley Baldwin's return to his vacation on the continent.

Mr. MacDonald called in Sir Samuel Hoare, foreign secretary, Anthony Eden, minister for League of Nations affairs, and Neville Chamberlain, chancellor of the exchequer, for a consultation. These latter three will constitute a "watching committee" in London to keep in touch with the situation and make decisions on points arising during negotiations prior to the September 4 meeting of the council of the League of Nations.

## Too Much Publicity

### Dr. Dafoe Says Quintuplets Need More Sleep

Callander, Ont.—The five little Dionne girls are not yet sufficiently grown-up to sleep well and as a result Dr. A. W. Dafoe, their physician, has decided their public appearance should be reduced from four daily to a couple of shewings.

"It is just a precautionary measure," said Dr. Dafoe, who explained so many people had been visiting the hospital daily for each of the four appearances that the sleep of the babies was being interrupted.

## Repair Costs Heavy

Edmonton.—The crushing blow which flood waters dealt to the lines of the Northern Alberta railways last month will necessitate immediate repair, conservatively estimated at \$250,000, it was believed in railway circles here. It was estimated that ten miles of track along the shores of Slave Lake would have to be rebuilt.

**Sweeping Victory For Social Credit Party In Alberta**

Calgary.—Alberta will have a Social Credit government, headed by William Aberhart, the 57-year-old Calgary founder of the Alberta Social Credit League.

In its initial bid for power, and the first time the electors of a Canadian province had ever been offered a Social Credit administration, the league candidates made a sweep of the rural ridings.

Surrounded by members of the Social Credit league in Calgary, Mr. Aberhart, who was not a candidate, received the election returns at the Prophetic Bible Institute, which he founded here some years ago. It was here he organized the Social Credit league.

In an address to his followers, Leader Aberhart declared:

"I feel our opponents failed because they were fighting against the greatest economic movement that had ever been seen. He who fights against 'truth and progress' fights a losing battle," he added.

He described the election as a "revolution of ballots instead of bullets" and appealed to all those who had opposed his movement to make the organization unanimous.

"Come on now, fellows, join us," he invited.

Ready to lead his party as premier, Mr. Aberhart will have to seek office in a by-election. It is planned to make a seat for him at an early date.

## NOTES AND COMMENTS

**A**LBERTA, swept by a wave of emotional appeal, sensational in its effect, a wave of religious-political enthusiasm which has astounded the rest of Canada, ignoring business logic and the structure on which business is built, creates a situation fraught with difficulties the consequences of which will be demonstrated in a very short time. As a house built on sand cannot stand, neither can a government function which has no plan and which has been elected on such a flimsy structure as faith alone. In things spiritual the plea has often been made that faith will move mountains, but Evangelical revivals have aroused people to enthusiasm which often as quickly dies.

**WE ABSOLUTELY** believe that the minority of electors of Alberta who refused to be stampeded into voting for Social Credit will ultimately be satisfied that their judgment was right.

**T**HE stampede of the majority does not prove they are right, even though their leader claims divine guidance. The minority will never submit to demagogic rule; will not be forced into accepting intolerant dictatorship. It is not with bitterness of defeat that these thoughts are penned, but in the firm conviction that time will prove Alberta's hopes as expressed by the majority in last Thursday's election will crumble as surely as the house that was built on sand. We cannot view the political structure of the Aberhart party in any other way.

**W**ITH an overwhelming majority, Mr. Aberhart has a clear field and will therefore have every opportunity as far as the provincial legislature is concerned, to put his basic dividend and just price policy into effect. He will not be able to defend a non-fulfilment of these promises because of provincial opposition, though it is conceivable he will find difficulties in financing with sources of capital outside of the province. The real test of constitutionality of his methods is to come—in fact Aberhart's battle to satisfy the vast majority who voted for him will be even greater than the election campaign.

**T**HE RESULTS clearly prove it was the cause and not the individual candidates the people voted for. Among the defeated were men of proven value, including mayors of cities who had served for many years, losing to new and unknown candidates.

**T**O DON. MacNEIL, the candidate supported by many friends to oppose Aberhartism, credit is given for the good showing he made in comparison with older and much more experienced campaigners. His sterling qualities were admired by faithful workers who anticipate that though defeated in last Thursday's elections, he will yet rise to prominence should he continue to aspire to political leadership. Alberta must eventually settle down to some government of its affairs, when sensationalism and religious appeal will no longer stampede people into chasing rainbows.

**M**ISTER ABERHART'S followers have five years in which to make good on the proposed policy. It is not likely any recall measure will be put through the house, for now there is no opposition, the members are not likely to vote themselves out of \$1800 sessional indemnity each year, with free railway transportation and other privileges that go with membership.

**T**HE JOURNAL gave to all parties equal space in reporting meetings. Such a policy incurs both blame and praise, according to individual viewpoints. Our editorial stand was for the election of Don. MacNeil, and the votes given him compare very favorably with the votes older campaigners secured, and who went down to defeat. Never waxing bitter at any time, though policies were sharply discussed, there are no harsh words to recall or regret. The will of the people has been declared in an avalanche of votes which indicates that no matter how thorough organization may have been, it availed little against the tide of popular opinion which decided for a change in provincial government. This attitude must have been an important factor in addition to the promise of monthly dividends which was the alluring bait to thousands of voters. This is evidenced by the hundreds of applications for naturalization by people who for years had lived in the province without applying.

**H**OWEVER—the people have given Mr. Aberhart a free hand to go ahead, and many who have counted on fulfilment of his political promises will anxiously await developments, for he declared times without number—"It can be done!" Time alone will tell. Conditions could not be more propitious for this great experiment to change the system whereby purchasing power is to be placed in the hands of the people, to "abolish poverty in the midst of plenty."

**N**OW the shouting and the tumult has died down, the consensus of opinion is that no obstacles should be placed in the way of Aberhart's attempts to establish a new social and economic order.

## LOCAL AND GENERAL

Elk's carnival, Sept. 7 and 8.

**F**VERNON, proprietor of Rawleigh's store is a Calgary visitor this week.

**M**rs. B. M. Christie and children of Calgary, were the guests of Mrs. W. Dibble for the past week.

**M**r. Murray McLeod of the Fairview Ranch, Hosmer, B. C. was a Coleman visitor this week.

**M**rs. and Mrs. Francois Vernon of the Rawleigh novelty store at Fernie were Coleman visitors this week.

**M**rs. Luke Lindoe, accompanied by Mrs. J. Devine and Sheila, and Margaret McDonald motored to Calgary last Thursday.

**M**rs. Wyndham Jones is spending a few weeks at Lethbridge and will likely visit at the coast before returning.

**T**he marriage of Mr. Adam Wilson of Coleman and Miss Angelina D'Avio of Hillcrest took place on Saturday evening at the manse, Blairsmore, Rev. A. E. Larke officiating. Witnesses were Robert Wilson, brother of the bridegroom, and Miss Georgia Emery.

## Mis-Spelt Word

**C**ompetition The intentional mis-spelt word in the issue of Aug. 16 was "Furrier," in the advertisement of Modern Dry Cleaners. It was spelt with only one letter "R."

Those sending in correct answers were Daisy Lochrie, Roy Genario, and Winifred Mitchell. Others sending in replies were John Ruston, with the typographical error in Cole's theatre ad., with the word William wrongly spelt, and Wilhelmina Michalsky also picked out this word.

In connection with the competition of Aug. 8, Mrs. George A. Brown writes: Regarding the mis-spelt word "Instalment," it was an error. The "Highroads" and two other dictionaries have the word install, installed, installation. I would be glad if you would correct this.

**E**d. Note: In this connection, Webster's dictionary has the word, vise, instalment, or installment, leaving it optional to use either way. Either is correct, according to whichever way the person decides. It is pleasing to note the interest taken in these mis-spelt word competitions, and The Journal welcomes comment on same.

The winner this week is Daisy Lochrie, who will receive The Journal for one year.

With a \$3.00 paid-in-advance subscription and a half year, a beautiful silver bowl, advertised in this issue, will enable you to receive The Journal for be given as a premium.

## Local News

Monday next is a Dominion holiday.

Miss Peggy Fairfull of Calgary is the guest of Mac Bell of the Grand Union hotel this week.

Mr. and Mrs. A. M. Morrison left on Sunday for a month's holiday at Victoria, B. C.

Mrs. Philips of Vancouver Island is the guest of her parents, Mr. and Mrs. J. Hopkins sr.

Adam Walker of South Wellington, Vancouver Island, is a visitor in town this week, the guest of friends.

Mrs. Geo. Derbyshire and son Jack left Sunday evening for Crawford Bay, B. C. for two weeks vacation.

Rev. A. S. and Mrs. Partington and Mary returned last Thursday from several weeks holiday at Nelson.

Mr. and Mrs. E. W. Beart, accompanied by Mr. and Mrs. Steve Penny, motored to Lethbridge on Thursday for a visit.

Mrs. Rob. Holmes left last week-end for three weeks vacation at Trail; where she will visit her three sons, James, Alex and Tom.

Miss Vera Ingram of Estevan, Sask., was the guest of Marjorie Halliwell last week-end, leaving on Sunday to visit friends at Banff and Calgary.

Mr. and Mrs. Adam McLintock and family left Friday morning for Spokane and coastal cities where they will spend their vacation.

Jack Devine stated last Thursday he was observing his birthday anniversary. Asked how young he was, he remarked "Life begins at Forty."

Mr. Taylor and family left Monday for a few days holiday at Calgary and Edmonton. Mr. Taylor, member-elect for Pincher Creek, attended the caucus at Calgary Wednesday.

Mr. Stacy of Macleod is relieving Chas. McKinnon, station agent, while the latter is on vacation. Mr. McKinnon joined his family at Calgary where they had been vacationing.

Bright beaming smiles adorned the countenances of Social Credit supporters as they chatted over the result on Friday morning, in anticipation of basic dividends, which Mr. Aberhart states will be not less than \$25 monthly.

Mr. and Mrs. Wilcox of Brandon were visitors at Mr. and Mrs. A. M. Morrison's this week. Mrs. J. A. McLeod has been a guest for the past few weeks, and Mr. McLeod came from Cadomin on Friday last for a visit.

### The Wise Old Owl

A little bit of political gossip heard in passing—Liberal orators telling audiences that times are always good when the Liberals are in power. Will they kindly explain how the depression started during the life of a Liberal government in the years 1925 to 1930? Of course, they'll come back with the argument they have become worse since 1930, an there 'yeare, take your choice.

At that, party government prevails because every man is either a Liberal or Conservative, may-

be not in name, and though men may occasionally vote for a third party, the majority generally support one of the major parties. History of Canadian political life since Confederation proves it.

Last Saturday, pay-day, there was not a single mendicant or other person standing at the bank door soliciting alms or contributions. Constable Antle was agreeably surprised. It is surmised that all were so pleased with the prospect of basic dividends that they no longer feel the urge to go begging.

Continual vigilance and persistent effort is the price of success.

A business that has faith in itself advertises in The Journal and wins the faith of Coleman people.

## Local News

Mrs. Kay Williams of Corbin, was a visitor over the week-end.

George Chahley is spending several weeks at Grand Forks on the fruit ranch of his parents.

Douglas Moores is holidaying at Creston, returning with his grandfather, J. Moores, who was recently visiting here.

Marion Puffer returned this week from Edmonton, where she had been spending a few weeks holiday.

If other streets in town were surfaced in the same way as Main Street, it would help to abate the dust nuisance caused by cars and winds.

Mr. and Mrs. Douglas of Vancouver were visitors with Mr. and Mrs. Edgar Reid this week, and on Monday motored to Waterton. The latter left on Wednesday for Vancouver to spend a holiday.

Henry Zak has purchased the Burns building on Main street, used almost since the town's inception as a meat market. This week Herb Snowden is painting the building, the fourth time in 22 years, he states.

J. H. Snod, who recently resided as night watchman at the International mine, was compelled to give up work after a week, owing to hemorrhages, from which he has suffered for a considerable time. His place has been taken by J. Wood.

TROUT fishing appears to be better in some streams. Tom Holstead brought in a fine catch from Spring Point over the weekend, and Alex Ballock brought in a 2-pounder which he presented to the editor. Together with what Mr. Holstead had in, the editorial family had a real feed, thanks to their skill.

Judge J. D. Matheson on Thursday noon informed the Herald reporter that Mrs. Matheson's condition remains unchanged. The Judge came home by plane last Friday to be at the bedside of Mrs. Matheson who has been seriously ill for the past two weeks.—Grande Prairie Herald. Monday's Lethbridge Herald reported the death of Mrs. Matheson.

ST. PAUL'S UNITED CHURCH  
In the absence of the minister next Sunday, Sept. 1, Mr. Dutton of Frank will take the service in the morning worship and preach.

The Sunday school will resume its sessions at 12:15. Will the parents co-operate in seeing that scholars are back in their classes?

The Board of managers will meet in the church Tuesday, Sept. 3, at 7:30 p.m. A full attendance is requested.

## WORLD HAPPENINGS BRIEFLY TOLD

French war veterans on a friendly visit to Canada were hosts to prominent Montreal war veterans and militia men.

Since Jan. 1 six swimmers in the harbor at Sydney, N.S.W., have been attacked by sharks and only two have survived their injuries.

The high price of pork has made the hunting of wild hogs a popular sport. The meat brings about nine cents a pound in Texas.

A Corning, N.Y., minister's wife was denied United States citizenship because she refused to subscribe to the stipulation that she bear arms for the United States in time of war.

Bound for Idaho, a shipment of 75 purebred Suffolk rams left Calgary recently. The sheep were consigned to breeders at Caldwell, Idaho, marking a new export outlet for Alberta.

Despite poor crops the Doubt-hobbit communion in the west will meet their obligations this fall, M. W. Casagrande, Veregin, Sask., is reported as stating.

A television broadcasting tower is being built on top of the Eiffel Tower in Paris and is expected to provide regular service after three months testing.

Apple and other fruit trees will be planted in Moscow streets instead of the usual shade variety. State farms were ordered to cultivate 140,000 fruit trees to be planted at Moscow beginning in 1938.

The crushing blow which flood waters dealt to the lines of the Northern Alberta railroads last month will necessitate immediate repair conservatively estimated at \$25,000.

The Soviet Union's grain acreage as of Aug. 15 totalled approximately 142,000,000, an area comprising 68 per cent of the cultivated cereal lands, it was announced. The figure is about 7,000,000 acres above that for the same date last year.

William Green, president of the American Federation of Labor, said in a speech before the state labor federation's convention that the six-hour working day and the five-day working week must come, if jobs are to be given those who did not have them.

### Gifts For Aviators

Winnipeg Pilots Going To South Pole Wear Crest

When Pilots H. Hollick-Kenyon and J. H. Lymburner fly with the Lincoln Ellsworth expedition down in the South Polar regions during the coming summer months of the southern hemisphere, they will wear pinned to their breasts, two small silver replicas of the coat-of-arms of Winnipeg.

The gifts were presented to the men by Mayor John Queen at a dinner given by the Aviation League of Manitoba. "These mementoes," said the mayor, "will carry the good wishes and the high hopes and expectations of the people of Winnipeg for your success."

"But they are like a Scotch gift," his worship added. "There is a string attached to the giving. When you come back next May, I presume the Aviation Legion will have a celebration in honor of your return, and we want you to hand them back to the mayor of Winnipeg so that they can be framed and kept in the city hall as mementoes of the interest the city of Winnipeg has in this expedition, which we hope will be historic."

J. B. Coyne, president of the league, said Manitoba has a special interest in polar expeditions by reason of the fact Franklin tried to find a northward passage to the Orient north of Canada, and so gave a lead to Arctic exploration.

The flight which will be undertaken by Lincoln Ellsworth, with Hollick-Kenyon piloting, between Weddell Sea and Ross Sea, is 2,800 miles, as far as from Montreal to Vancouver.

### Monster Ice Breaker

Russian Ship Will Keep Northern Sea Route Open

Declared by Soviet authorities to be the largest ice-breaker in the world, a ship with 24,000 horsepower engines is being constructed near Leningrad. The new craft will be able to cross the 4,000 miles of the northern sea route without refueling. Other ships can follow in its track, greatly accelerating the journey. It is hoped that Arctic exploration also will be facilitated.

The moon not only causes a tidal wave on the side of the earth next to it, but also causes a wave on the opposite side of the earth.

## Claims Cure For Glaucoma

### Dread Eye Disease Yields To Drug

A dreadful word among doctors is glaucoma, hardening of the eye-balls. Salt and water in the blood keep out the blood vessels of the eye and into the eye's cavity. Because this salty liquid cannot escape, it jams the retina against the wall of the eye, slowly destroying the tasseled end of the optic nerve. Vision dims, blindness ensues. Drugs have proved of little help; surgery gives only temporary relief.

Dr. Emanuel M. (for euphony) Josephson, Manhattan eye and ear specialist, announced in Science that he had at last ascertained the true cause of glaucoma and could cure it with a drug.

The cause, he declared, was enlargement of the adrenal glands. These glands, situated one above each kidney, secrete two hormones—adrenalin in the core, cortin in the hull. One of adrenalins' effects is to draw sugar into the blood.

The effects of cortin, a scarcer substance, are less well known. Among such effects is control of the amount of salt and water in the blood. Secretion of cortin in the system increases the permeability of the walls of blood vessels and capillaries, permits a leakage of salty fluid from the blood.

Such leakage occurs in glaucomatous eyes. Dr. Josephson reasoned, probably because the patient's glands supply too little cortin. He bought some cortin at a drug store, injected it into the muscles of glaucomatous patients. Usually within half an hour eye pressure dropped to normal, tension and pain in the eyeballs ceased, and many purblind patients could see clearly for the first time in years.

Pursuing a hypothesis, Dr. Josephson gave cortin to near-sighted children. In most cases their vision also promptly improved. That must mean, he decided, that myopia and glaucoma are due to the same thing.

### Canada's Trade With Italy

Imports Last Year Valued At \$2,750,000 And Exports Over \$3,500,000

With Prime Minister Signor Mussolini so much in the newspaper headlines, people are apt to forget that Italy is still a kingdom and that the king is Victor Emmanuel II. Italian unity was accomplished under the House of Savoy after an heroic struggle continuing from 1848 to 1870. Cavour, the statesman, Mazzini, the philosopher, and Garibaldi, the soldier, being the principal figures. From a constitutional monarchy the kingdom's government has become, since 1922, a Fascist state, the basic idea being that the corporate or guild state based upon capitalism is supreme over the economic and social groups within the nation.

The peninsula and the seventy islands belonging to Italy have an area of less than one-fifth the size of Quebec, but the population of forty-two millions is four times that of all Canada. There is a large settled and floating population of Americans and Britiheans. Rome, the capital, is about the size of Montreal. Canada does a considerable trade with Italy, the imports last year being valued at about \$2,750,000 and the exports over \$3,500,000.

We get lemons, olives and cherries in brine, olive oil, wines, felt hats, silk fabrics, cream of tartar, tobacco pipes and many textile products. We send to Italy a good deal of wheat, rubber tapers, dried cod-fish, wood pulp, copper, nickel, sausage casings, upper teeth and fox skins. Cargo vessels run direct between Canada and Italy both from and to the St. Lawrence and Vancouver ports.

### Fruit Of Enormous Size

Strawberries In Alaska So Big One Fills Teacup

Strawberries, luscious and so big that one would fill a teacup, and rhubarb with stalks as thick as the wrist and three to four feet high, yet as tender and juicy as the early shoots grown in the United States, were found in Alaska by Harry J. Lance, Jr., of the Philadelphia Academy of Natural Science expedition that went there to study the blue bean. Offsetting the advantages of the fruits and vegetables of enormous size and fine flavor are the insects which also grow to enormous size. The mosquitoes, he reports, are twice as large and ten times as vicious as the Jersey variety. The party had to wear net masks.—New York Herald Tribune.

Dear Old Soul—But, doctor, if this is going to make me 10 years younger, how do I stand about my old-age pension?"

## IN VICTORIA, B.C.

It's Victoria's tree-shaded motor roads that have helped to win for the city the name of Canada's Evergreen Playground.

### Acrobatic Roller Skaters

Three High-Speed Russian Artists Performing In London

The most "revolutionary" Russians in the world have arrived in London. They are the Three Cossacks, high-speed acrobatic roller skaters, (two men and a girl), who whirl round at 150 m.p.h. on a table only eight feet square.

"This is the smallest table anyone has ever skated on and lived," John Gajosky, the leader, said when the trio are appearing at the Savoy, where the trio are appearing in cabaret.

"There is a black line running round the table over nine inches from the rim. All the time we are spinning we keep our eyes on that line and never go outside it."

"The slowest speed," he said, "is 160 m.p.h., and when working up to a climax we sometimes touch 150 m.p.h."

The Three Cossacks' chief fear is "refugegutalism"—breaking of blood vessels in the eyes or legs due to their becoming overloaded in the high-speed whirling.—London Daily Mirror.

### For H.B. Route

Meteorological Station At Chesterfield Inlet Is Urged In London

Resolutions urging establishment of a meteorological station at Chesterfield Inlet on the Hudson Bay route and of an ocean observatory at lonely Tristan da Cunha Isle in the South Atlantic were passed by a conference of empire meteorologists.

The savants, in private session in London James Patterson, of the government meteorological service at Toronto, attended, along with directors of every other meteorological service in the empire,

The biggest frogs in North America are the bullfrogs, which may have bodies eight inches long.

The world's largest kitchen is that of the Waldorf-Astoria, New York.

## SUNDAY SCHOOL LESSON

### SEPTEMBER 1

#### PAUL (Worker With Hand And Brain)

Golden text: In all things I gave you an example, that so laboring we ought to help the weak. Acts 20:35.

Lesson: Acts 20:33-35; Philippians 4:12-13.

Devotional Reading: Acts 22:3-10.

#### Explanations And Comments

**Paul's Example.** Acts 20:33-35. Paul urged his hearers to follow the example he had set. He had not coveted wealth, but had labored for his bread. He had not sought the favor of others, but had given to them. See Acts 15:3; 1 Cor. 4:12; 1 Thess. 8:18. In all things his life had been an example to them, and they in their turn should labor and help the weak. By "the weak" Paul probably means those lacking in means. Paul calls Carey's words "My business is preaching the gospel; I cabbie abroad to pay my debts."

It is a great thing to be able to say as did Theodore Roosevelt: "I am glad beyond measure that I am one of the many who have stood ready to spend and be spent; pledged to fight while life lasts, the great fight for righteousness, and for freedom, for God and for the welfare of man kind."

There was one way in which they could help the weak. Paul reminds them of these words of Jesus: "It is more blessed to give than to receive." These words of Jesus are not given in the Gospels, and they are the only saying of his that Paul quotes.

**Paul's Inventory of the Mental Furnishings of the Christian.** Philipians 3:8. "Finally, brethren," Paul says he had said this once before, in a letter to the church at Corinth. In this letter he says: "I have no equal in love for you, for I am zealous for you, for your welfare, the welfare of your souls, and for your salvation."

Electrical Engineer E. L. Brown, inventor of the apparatus, demonstrated its use before a score or so of California's most noted scientists, who watched with great interest while Brown annihilated a colony of termites flourishing in a piece of wood he had with him.

Termites, ant-like creatures that live in and on wood, are fast becoming a major menace in American life, according to recent surveys. In fact, they are estimated to cost American property owners about \$50,000,000 each year, and the possibility of their eradication excited great interest among the assembled scientists.

Brown's insect killing machine operates with "cold heat." Short radio waves passing between two electrodes have the effect of generating sufficient heat to kill the bugs without setting the wood in which the little nuisances are living, alive.

**Judging Was Easy**

When Walter Hines Page was a magazine editor, a writer addressed him with: "Now I'm positive you don't read them all. I submitted a story last week and, as a test, I pasted four pages together. When the story was returned, those pages were pasted together."

"Madam," Page replied, "when I open an egg at breakfast, I don't eat it all to discover it's bad."

The cornerstone of the original U.S. capitol was laid by President Washington on Sept. 18, 1793.

Blue, green, yellow, red and even black snow has fallen in various parts of the world.

## Little Journeys In Science

### IRON

(By Gordon H. Guest, M.A.)

Iron has played a very important role in the history of mankind and for many centuries has been the most useful of all the metals. The iron used in ancient times was made from iron pyrite. Some of the early pyrites made chariots and defensive weapons but, a sword that would bend easily was of little use as compared with weapons of solid bronze. The pyrites of the eighth century, however, how to harden and temper iron and they ushered in the age of chivalry with steel-clad knights. The products of these skilled workers of the medieval ages—knights, helmets, Damascus scimitars, Italian chain mail and Moorish shields—are famous in song and story. Indeed, they were almost as good as their legendary precursors.

Iron occurs very abundantly in nature and makes up about five percent of the earth's crust. Scientists have calculated that the centre of the earth consists of a sphere of iron and nickel 4,000 miles in diameter, and covering this is a layer of silicate of iron and magnesium 1,000 miles thick. If this be true, iron is by far the most abundant element in the world. Iron is found scattered in other elements, mainly in minerals and in most rocks and soils. It is a constituent of the green coloring of the blood of animals, and hence is of very important part in life processes.

Hematite, known by the scientist as ferric oxide, is the most important of all iron ores. This ore is found in large quantities in the iron-bearing rocks of the states of Minnesota, Wisconsin and Michigan. It is interesting to know that hematite has a red color to certain soils and rocks. Finely divided hematite is used very extensively as a pigment.

Brown hematite, or limonite, is another very important iron ore. This mineral imparts a brown color to soil. It is present in many ordinary clays; and when they are used to make bricks, the heat of the material turns red when it is fired.

Magnetite is another important iron ore and this mineral is attracted by a magnet, which fact is sometimes used to separate the magnetic material from crushed earthy matter.

Iron differs from some of the other iron used in industry in that it is soft and is of limited application. Iron which contains small quantities of other elements shows a great range of properties and is of the greatest importance in plants and in all ways present in quantities which range from slight traces up to seven per cent. There are many varieties of commercial iron, the chief of which are pig iron, cast iron, wrought iron, and steel.

### Found Mexico Interesting

Rotarian Delegates Report Temperature Even And The Climate Ideal

No need to go to Alaska to be cool or to Egypt to see the pyramids, according to Mrs. E. B. Flint of London, Ont., who with her husband attended the Rotary International convention in Mexico City. It's never too hot and never too cool down there, and the Aztec pyramids are almost as interesting as the famous ones on the banks of the storied Nile.

Mexico, situated 7,500 feet above sea level, has an average temperature, never above 78 and never below 60, the visitors were told. It has remained fairly constant.

In a city of more than 1,000,000 inhabitants there are only two machine laundrys, Mrs. Flint said, for the women still adhere to the primitive method of washing their clothes in the streams with a flat rock to rub on.

The pyramids built by the Aztecs several hundred years ago, were of great interest, and the least amazing feature was a primitive but effective shower installed in a niche in a wall below the pyramids.

At Fregate Garden, where land is so valuable that no houses are built on it, was another place of interest. It is possible to raise seven crops of corn a year on this land, and if a man sells a strip he merely digs another canal instead of building a fence to define the boundary.

The enormous demand for lemons that is something to be said for the new裁裁 for in a country where butter is scarce and nearly everything is cooked or doused in olive oil, an acid in the diet is essential.

Meanwhile the Italian consumption of lemons is bringing joy to California growers, who hope that prices will go up still further.—Detroit News.

### Story Of Homer's Illad

Professor R. A. Darr has placed in a London safe deposit manuscripts 3,000 and 4,000 years old, which, he says, prove that the story of Homer's Illad, greatest of classical Greek poems, the epic of Helen of Troy, whose face "launched a thousand ships," originated in an Indian epic poem written centuries before Homer was born.

Panama is attempting to grow rubber, and 30,000 trees are being planted.

The fellow who tells you how hard the work wouldn't have time to tell you so if it were true.

PATTERN 5260

Dress up your kitchen so you will be proud of it! Add decoration with these effective mammy towels. You'll love embroidery them—each motif is a different household task—each lends itself to the use of a variety of colors. Here's one for each day of the week. Make them for yourself—or for a bridge party—a shower gift. Their drill design will make them welcome anywhere.

In pattern 5260 you will find a transfer pattern of seven motifs averaging 5½ x 7½ inches; material requirements and color schemes.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg, Manitoba.

There is no Alice Brooks pattern book published.

**for RHEUMATISM**  
Poor Miner's loss a warm  
dust. Rub liniment gently in;  
then apply to affected part  
and you'll get relief!

## MISS ALADDIN

—By—  
Christine Whiting Farmerette  
Author Of  
"One Wide River To Cross"  
"The Unknown Port". Etc.

### SYNOPSIS

Nancy Nelson is a sub-deb, a gay irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market, her Indian mother loses all her headgear and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Coleman's offer is accepted, and Nancy and Jack move to Pine Ridge.

Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and misses the path Aurora Tubs had told her to take. She tracks along the road, driven by Mattie Adams, and she asks him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's.

There, Mark Adam, Nancy's father, has broken his leg, and that

Jackson Nelson has been hired to help while Luke's leg gets better. With

Jack away, Nancy finds that she is too poor to have anything to eat. She reads the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare so all they could induce others to do the same.

Nancy and Matthew Adam go Christmas shopping in a neighboring town. On their return to Pine Ridge, Nancy is amazed to see the Colonists residing in up-to-date houses. Matthew if he knew why? He said: Let's go in and see. Then Nancy learns that she is having her debut, but in a different setting than had been planned for her in Boston.

### Now Go On With The Story

### CHAPTER XIV.—Continued

"She was a courageous woman, my mother, but I have sometimes wondered what was in her heart as she set me on my feet and moved toward that door, unarmed. Did she expect to confront a band of roving savages? What met her eyes was a single brave, and a boy of, possibly, seven years old. No doubt the Indian looked sinister enough. Only the week before a woman not many miles away had been scalped and mutilated. The horror of that story was still upon her; yet she did what may have been the only thing that protected herself and me. My mother smiled! It was, I imagine, a smile born out of terror; but that grim-visaged Indian was a gesture of friendliness. Who knows but that there had been more such gestures, one page of our history would have been less tragic. And then, although her hands were so tightly clenched that (she found later) the nails had pierced her flesh, she looked straight up at him and said two words which sounded strange to her own ears in such a moment. Perhaps you have guessed them, for what my wonderful little mother said was 'Merry Christmas'!"

Miss Columbine paused, and there was silence until Aurora Tubs exclaimed: "But you ain't tellin' us that wild Injin knew what she said, Miss Columbine! It's not believable."

The old lady seemed to be looking at something far away.

"Not the words," she answered, "but perhaps he understood the

### WHEN YOUR DAUGHTER COMES TO WOMANHOOD

Most girls in their teens need a tonic and galvanizer. Give your daughter Lydia E. Pinkham's Vegetable Compound for the first few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

Sold at all good drug stores.

**Lydia E. Pinkham's Vegetable Compound**

smile; and she spoke gently. He came into the room, followed by his boy, and stood, arms folded, looking down at that small, gay tree and that happy little girl who knew no fear. For a moment I was too absorbed to note the callers; then, glancing up suddenly, I laughed with pleasure. Here was another child! I held my doll aloft so that the Indian boy could see it. "Look!" I cried joyously. "My new baby! See!"

"The boy reached out and took it from me, his white teeth gleaming in a quick smile. The man grunted something unintelligible and moved nearer the tree. He seemed, my mother told me, both puzzled and admiring, like a big child wondering what it was all about. He touched a yellow butterfly made from a scrap of paper; said something more, letting his glance rove slowly about the room. Her heart quickened as his eyes rested on the rifle; then subsided when he made no move to touch it. The boy, still admiring my homemade doll, said something rapidly and took from its neck a string of beads, holding them out to me. It was my mother understood, meant as an exchange for my clothespin baby, and fearing trouble should I rebel, she said: "See darling, he has brought you a Christmas gift! Let him keep your dolly. I have another exactly like it for you; and this poor boy has a lovely tree, perhaps no mother. Tell him to keep it."

"My lip trembled; but she took the beads and put them about my neck, and suddenly I was enraptured with this new treasure. Apparently I was desirous of doing something for the other Indian, for I lifted the paper butterfly from its branch and held it out to him, saying: "It's your Kismus gif, man! Merry Kismus!"

A breath of pleasure swept through her audience as Cousin Columbine ceased speaking; then she continued:

"I seem to remember the Indian stooping to take my offering. I know he smiled, though that is something my mother never corroborated. He grunted a word or two, intended, I was sure, as thanks; gave one more curious look at the small tree; and then left us, those strange, strange Christmas guests, mounting their ponies and riding into the forest, disappeared, my father used to say, by a smile of welcome."

"And did you ever see them again?" questioned Eve, Adam, her low voice very gentle.

"Never again. What they came for—where they were going, we never knew. And only a half hour later there sounded close to the well-barred door, the clear, sweet note of a herald thrush! Not until then did my valiant mother give way to tears."

Said Matthew Adam, gravely:

"That is the nicest Christmas story I ever heard, Miss Columbine."

"And now," suggested his mother, going to the melodeon, "let's end our evening by singing some of the good old carols."

Later that night when the guests had departed and the Nelson man stood quiet in the moonlight, Nancy went to her tower and gazed for a moment at the snowy Peak. It had been a long, exciting day, and suddenly conscious of being tired, the girl opened the window and slipped gratefully into her big black walnut bed.

The moon was very bright and she saw quite clearly Aurora's calendar and the military figure of General Grant, looking down upon her from the wall. She saw too, that her chiffon gown lay where she had tossed it carelessly, in close proximity with the patchwork quilt, and Nancy smiled to herself, there in the moonlight.

"Chiffon and calico!" she murmured drowsily. "I guess they aren't so far apart as I used to think." Then her eyes lit to the steel engraving and she laughed a little.

"Good-night, General Grant," she said politely. "I was pretty insistent to you at first, but I believe I'm getting to rather like you. Perhaps it's the uniform. They say that sooner or later a woman always falls for a uniform. I'm sorry you weren't downstairs this evening, General. It was a wonderful debut!"

### CHAPTER XV.

It was at Christmas dinner that Nancy divulged her plan for the Aladdin Library, a proposition which met with instant enthusiasm. John Adam readily agreed to supply the sign; and one day in January Mark brought it in from the ranch.

"Dad's been so temperamental you'd think he was painting a picture for the Art Museum," he declared. "Honesty, Nancy, since you wished this job on him that man's neglected his cooking shamefully, and the sign's a corker."

"I'll say it is!" Nancy spoke almost with awe. "I never expected

anything so—so professional and these Aladdin lamps at either end are stunning. Your father must have spent a lot of time on this sign, Mark. Can you put it up if we go over to the schoolhouse now?"

"I came prepared, lady; and there's a box of books at the station which our sweet young Denver cousin collected for you. Matt'll be down to finish the shelves this afternoon and—Hi there, Aurora Tubs! Come see this sign."

Aurora emerged from the kitchen and stood, arms akimbo, admiring eyes on John Adam's handiwork. "If it don't look exactly like a bought-one!" she exclaimed. "But if those fancy things is meant for lamps, Mark Adam, you must be terrible old-fashioned and hard to kill. Your father's a regular artist, ain't he? I wonder what he lettered for some o' the silly things ever since Victor's cousin Ella had some done 'em in a doorway in Denver."

"Sure he'll do 'em for you," Mark promised recklessly. "Hello, Miss Columbine. Just look at Father Adam's masterpiece."

Cousin Columbine came briskly down the steps. "It's a beauty, isn't it?" said Nancy, her face glowing. "It surely is. Are you going to put it up to-day, Mark?"

"Soon as I swipe a ladder out of your barn?" You'll have to come along, Nancy, and boss the job."

Those days were full of interest for Aunt Louise and the girls at school had responded generously to Nancy's plea for books. Mother and Dad had doubled the number; Mark had collected twenty more; and Aunt Judy, immediately on hearing about the scheme, had sent a check for the purchase of new ones.

No check had ever looked so big to Nancy Nelson, or been so welcome; and one day Mark drove her to the Springs to purchase this important addition to her library. He also improved the occasion considerably by taking her to lunch at the Anderson Cabin Room, and to a movie after they left, those strange, strange Christmas guests, mounting their ponies and riding into the forest, disappeared, my father used to say, by a smile of welcome."

"And did you ever see them again?" questioned Eve, Adam, her low voice very gentle.

"Never again. What they came for—where they were going, we never knew. And only a half hour later there sounded close to the well-barred door, the clear, sweet note of a herald thrush! Not until then did my valiant mother give way to tears."

Said Matthew Adam, gravely:

"That is the nicest Christmas story I ever heard, Miss Columbine."

"And now," suggested his mother, going to the melodeon, "let's end our evening by singing some of the good old carols."

Later that night when the guests had departed and the Nelson man stood quiet in the moonlight, Nancy went to her tower and gazed for a moment at the snowy Peak. It had been a long, exciting day, and suddenly conscious of being tired, the girl opened the window and slipped gratefully into her big black walnut bed.

The moon was very bright and she saw quite clearly Aurora's calendar and the military figure of General Grant, looking down upon her from the wall. She saw too, that her chiffon gown lay where she had tossed it carelessly, in close proximity with the patchwork quilt, and Nancy smiled to herself, there in the moonlight.

"And me, worryin' myself sick for nothin'!" grumbled Aurora.

"A movie! Not even a flat tire; and is wonderfule if your necks was broken."

That day seemed long ago to Nancy when on an afternoon in February she went down the unkempt street, turned at the filling station and ascended a low hill on which stood the abandoned schoolhouse, "erected in 1902," Cousin Columbine had told her, to replace the one destroyed by fire. It was a small, frame building with no pretense at beauty; but the girl paused for a moment to admire John Adam's handiwork before she unlocked the door.

The air outside was warmer than within, and Nancy opened a window before proceeding with what Jack called "janitorial duties." The air tight stove must be lighted, and the whole place dusted before the first arrival should appear. These tasks completed, Nancy sat down behind the kitchen table which served as librarians desk, and looked about with satisfaction.

Perhaps the girl didn't wholly realize that this satisfaction which was like nothing she had ever experienced before, was the result of having achieved something—something really worthwhile. She had had help, of course; but the idea had been her own, and Nancy had put it through triumphantly.

"I didn't have done it without the others," she told herself, "put at least, they wouldn't have done it without me. It had never occurred to them; and Cousin Columbine was doubtful that the plan would work."

Yet, being no wet-blanket, the old lady had done her bit by arranging for the use of the schoolhouse, and writing to the Oklahoma family who came to Pine Ridge summers. This proved an inspiration, for they responded with a box of books and a beautiful Navajo rug in grey and scarlet which covered the centre of the floor, giving the place a homely look.

"And some day," mused Nancy, as if her stay in Pine Ridge was to be indefinite, "we'll put in a fireplace. That's all we need to make it wonderful."

(To Be Continued)

### New Method Of Rust-Proofing

Shows No Rust After 1,000 Hours

Or Salt Spraying

An entirely new method of rust-proofing, which for the first time in the history of electro-chemistry, utilizes alternating current in the process, has been perfected by the Ford Motor Co., and is now being used on its entire production of head and tail lamps, the Ford lamp plant at Flat Rock, Mich.—the famous "factory in a meadow."

The new process was adopted because it requires less floor space than other rustproofing methods, provides a surface all ready for painting as the article comes from the rustproofing machine, and withstands at least 300 hours of salt spray test without deterioration. Tests of 1,000 hours under salt spray have shown no rust, Ford chemists say. This is the equivalent of many years of ordinary use.

The process, which was first developed outside the Ford organization, did not work well when Ford made the first commercial installation. The treated articles developed in part an "alligator" surface which was not fit for painting. It was finally decided the trouble arose through the lamp shells being too clean when they went into the zinc phosphate rustproofing bath. So instead of the shells going through a washing machine first, they are now made "dirty" by an operator who wipes over with an oily cloth the surface to be painted. The film of oil provides enough protection from the acid in the rustproofing bath for the deposition of zinc to begin to form.

The effect of the alternating electric current is to permit the articles to take up the zinc with interference from hydrogen bubbles which form on the surface of the article to be rustproofed in the absence of electricity. The process is not electro-plating, however. In electro-plating, the article to be plated is an anode of the electrical circuit, whereas in this new process the article is alternately cathode and anode, alternating 60 times a second.

### World's Worst Volcano

Exudes Salts Of Ammonia Fumes That Suffocate Every Living Thing

Koh-i-Tatfan, known as the world's worst mountain, has again been in eruption. It is on the British-Persian boundary in Baluchistan, and for nearly 100 miles around no man, beast or reptile can survive. It is the only mountain in the world which emits lava from its crater and exudes decomposed salts of ammonia, sulfuric acid and carbon dioxide which suffocate every living thing and burns up the plants. Its activity was heightened by flights of frightened fowls escaping from the dreadful furnace which suffocates and blinds. No tropes can be maintained near Koh-i-Tatfan, although it is on the frontier of Hellfire's "Mound of Hellfire" the Persians call it.

How Club Was Named

An organization of veteran New York printers is oddly named the Judgment Day Club. On the night of New Year's Eve the club suspended publication, a composing room employee remarked, "This is Judgment Day—it's the end of the World." And that's how the tradition of old New York World printers got its name.

"Wot I say in the man should have all the say in the home; that's wot I say."

"I say the same—only I don't say it."

## A WORLD OF FLAVOR

### Tracing Migration Stories

Skeletons Help Archaeologist Working On Lonely Island In North

The life story of successive waves of civilization which crossed the island stepping stones between Asia and America is being traced on lonely St. Lawrence Island in the Bering sea.

The story—told in human skeletons, animal bones and broken utensils—is being preserved in paraffin. The work was described in a letter from the expedition headed by the noted Alaskan archaeologist, Dr. Otto Geist.

Aided by 30 or 40 Eskimo laborers from nearby Savoonga, the scientists are excavating skeletal remains and carefully brushing them with melted paraffin to preserve them for shipping to research laboratories.

Having removed much of the overburden and remains of comparatively recent eras in the eight past annual expeditions, the party this summer uncovered a layer of ancient culture antedating the discovery of the island by Captain Commander Vitus Bering on St. Lawrence's Day, Aug. 21 (old style) 1728.

The immigrants crossed over in seven successive waves, Dr. Geist believes, between Asia and America. Some earlier civilizations were of a higher culture than some of the later ones, he has determined.

### Webster Air Trophy

Kingston Flyer Wins At Competition Held In Montreal

With a skillful display of airmanship, Pilot Gordon R. McGregor, president of the Kingston, Ont., Flying Club, captured the Webster memorial trophy and the title of Canada's foremost amateur aviator at Cartierville airport at Montreal. Competition for the Webster trophy, awarded by the family of John C. Webster, of Shiedac, N.B., killed in a crash here several years ago, was held under the auspices of the Canadian Flying Clubs Association with the co-operation of the Montreal Light Aeroplane Club. McGregor eliminated 11 other airmen, including two westerners, to gain the award.

Wes Hodson, 18-year-old Regina newsboy, who was competing in a secondhand plane purchased from his savings as a newsboy, took every test but failed to gain enough points and finished last in the competition. "Well, I may have better luck next year," he said after hearing the results. Fred Lashay, of the Moose Jaw Flying Club, also competed.

### Speed Of The Times

In 1820 it required 57 hours of human labor to grow an acre of wheat yielding twenty bushels, while to-day, we are told by T. A. Russell, of Toronto, it requires approximately 42 hours. This is only keeping up with the speed of the times. We are travelling to-day more than seven times as fast as our grandparents did a hundred years ago.

The first university chair in the country devoted to the study of spirituality is to be established shortly at Lund University in Stockholm, Sweden.

In the South Sea Islands, frigate birds are trained to carry messages like homing pigeons.

God is not unrighteous to forget your work and labor of love which ye have showed toward His name, in that ye have ministered to the saints, and do minister. Hebrews 6:10.

Wherever in the world I am, In whatso'er estate, I have a fellowship with hearts To keep and cultivate, And a work of lowly love to do For the Lord on whom I wait.

We do not always perceive that the commonest things, the writing of a note, the making of something intended as an offering of affection, our necessary intercourse with characters that have no congeniality with our own, may be made the performance of a most blessed and sacred work, even the carrying out, after our feeble measure, the design of God for the increase of happiness.

Definite work is not always that which is cut and squared for us, but that which comes about as a claim upon the conscience.

### Tackles Big Job

Mayor of New York Aims To Make City Noiseless

New York City, with all its hustle and bustle and commotion, free of unnecessary noise, is the job tackled by Mayor F. H. LaGuardia. Shrieking auto, blaring radios, rumbling trucks and noisy garages—anything that makes a noise—are to be curbed. Even police patrol cars and fire engines must not use their sirens unnecessarily. Heading the mayor's planned program is a month of "noiseless nights." He thinks everyone should be able to sleep uninterrupted. That campaign will operate through October. Then, during November, will come a month of hoped-for "noiseless days." The mayor thinks that by the end of that month he'll have everybody enjoying 24 hours of quiet each day. The mayor has created the job of "NAC"—Noise Abatement Commissioner—and gives the portfolio to Major Henry Curran. Major Curran now is in Europe studying noise abatement systems.

### Rabbits Cause Floods

Dikes Burrowed Nearly Hollow, Reason For Their Collapse

Rabbits have been responsible for serious floods in the Swiss canton of Valais. Intense heat throughout Switzerland has melted an unprecedented quantity of snow, which has swollen the headwaters of the Rhone into flood tides.

This rare contingency is provided against by dykes built on the banks of the rivers. These, however, collapsed due to the fact that they had been burrowed nearly hollow by a vast colony of rabbits.

### Grows Billions Of Flowers

The number of flowers used in Grasse, France, in the manufacture of perfumes staggers the imagination. In a single year ten billion jasmine blooms, about forty million pounds of roses and some fifty million pounds of orange blossoms are harvested for the great perfumeries.

In addition, Grasse sends cut flowers by special trains to nearly every part of Europe.

Save "LEFT-OVERS" with Appleford's Presto Pack Waxed Tissue

MORE CONVENIENT TO USE...

Just hang a package in your kitchen. You'll be delighted with its convenience... for, with one hand, you can easily extract a single sheet at a time leaving the other hand free to hold the "left-over" being wrapped.

### Coal Creek vs. Coleman in Cup Tie Game Here on Saturday

One of the best soccer games of the season should be seen at the local grounds on Saturday when Coal Creek meet the local eleven in the semi-final of the Grand Challenge cup. The game will start at 5 p. m. and it is expected Coleman will field their strongest eleven. The winner will meet Blairmore in the final, the latter having defeated Fernie last Sunday at Fernie 3-2.

Buy typewriter ribbons and copying paper at The Journal office. Blank counter check books or printed to your order, may also be obtained.

### INTERESTING NEWS ITEMS OF PEOPLE YOU KNOW

Mr. and Mrs. Wm. Lees are spending two weeks vacation at the coast.

Master Douglas McDonald of Rossview, B.C. has been the guest of Melville Vernon for the past week.

Mr. and Mrs. Tom Beveridge and family of Vancouver are the guests of Mr. and Mrs. Archie Beveridge this week.

### Former Colemanite Died

Descendant of Polish nobility, and resident of Edmonton for 30 years, Mrs. M. Batter, 69, wife of Peter Batter, is dead at her home here. She was born in Pusen, Germany, daughter of Count Rakwitz, a Polish nobleman.

Mr. Alex. Easton informed The Journal that above lady's husband, now dead, worked in the International mine 30 years ago, and they lived in the building where Heilbein's barber shop is now established.

### HARD BUT HEALTHFUL

Governor Eugen Talmadge of Atlanta, Georgia, who also edits a paper, says: "Newspaper work is all work and no play, and very little pay. I used to think anybody in newspaper work had a nice, interesting job."

"When you keep a paper going, and try to keep your news columns interesting, let me tell you, brother, you've got a job on your hands. I'm keeping my paper out of debt, but it's hard work."

And yet the Sherbrooke Record recently carried a most interesting account of life and work of Lord Atholstan who has capably edited the Montreal Star with quarter million circulation for sixty-six years. The Record says: "Lord Atholstan was born as Hugh Graham, in the little village of Atholstan, Huntingdon County, July 5, 1845, but journeyed to Montreal, as did many other ambitious lads from the peninsula of Quebec Province. He started the Star whilst the other papers in the metropolis were in either a somnolent or a poor stage." Lord Atholstan is 87 years old. Newspaper work may be hard, but it must also be healthful.

### FIGHT FEAR, URGES MARY RINEHART

"What is your greatest fear? What keeps you from sleeping at night, and what keeps you taut and tense by day?

Whatever it is, fight it, advises Mary Roberts Rinehart. It is because we are all afraid that we can't progress. A terrified world is nothing but a terrified mass of human beings. And scared people are beaten before they start.

"I have been afraid for five years," she admits in the September Cosmopolitan. "But then, I have been afraid all my life; of the dark, of lightning, even of cows! Goose flesh and I are no strangers, but old and intimate friends."

But she is fighting it.

"Recently I tried a small experiment, she states. "I walked along the street and watched the faces of the people. It was not hard to divide them. The worriers were hurrying, looking ahead with strained faces and seeing little or nothing as they went. The others—those who had put fear aside as a useless part of the load—were enjoying the bright day. They had time to look about, and their faces were quiet and calm. In time I found my own pace slowing and I tried to relax my face."

The thing that is retarding us now, as a nation, she says, is fear—collective fear of the future. Our nightmarish act of our fears is striking.

"Most of the things I have feared have never happened," she says. "I have lived through any number of domestic catastrophes which did not occur, but the fear of which has left me white-faced and trembling. I have lived through several depressions, only to see the country arise bigger and better for its purging. But I can remember no single instance when worry or fear has helped me at all. I have averted nothing by either of them; but I have lost many otherwise sunny days and missed much of present happiness by being afraid the sunshine would not last."
